

COVID-19 Vaccine Community Clinics – Weekly Update

DHHS Community Care & Vaccine Equity

For questions or more information: DHHS.vaccinepopupclinics@maine.gov

Week of: August 8, 2022

Please Note: These are the clinics that the DHHS Community Care team helps to arrange and/or is aware of; it may not include every community clinic in the state, but we try our best to stay informed of what's happening.

NEW or updated information is highlighted.

For all statewide vaccination sites, see [Covid-19 Vaccination Sites in Maine](#). Additionally, [Map of Vaccine Locations in Maine](#).

Updates & Outreach Messaging

1. For Covid-19 and vaccine-related messaging and educational content, check out Maine CDC's [COVID-19 PSAs](#) and [VaccineAnswersForME](#) (VAFM) on their Youtube page.

- a. Melinda Thomas at NEAAO is also working on creating subtitled versions in multiple languages for one of the ads and the VAFM video about why you should vaccinate your 6month-4yr old. We will share this content when it's available.
2. [Maine Covid-19 Vaccine Map](#): Our team has compiled an interactive map of all the vaccination sites in the state and is maintained by the DHHS Covid-19 Community Care team. The data comes from the [Maine State Covid-19 Vaccine website](#) and includes community pop-up clinics. We are keeping the information updated to the best of our ability. Many vaccination sites have been called, confirmed, and updated since June 2022. This will be an on-going project.
 - a. Click on the map points to see more details, including: operational hours, phone numbers, ages served, vaccine brands, appointment/walk-ins, etc.
 - b. We are crowdsourcing for help maintaining this map. If you or anyone you know may be interested in helping us maintain it (or taking on a region or a town), please email DHHS.vaccinepopupclinics@maine.gov.
 - c. The map is publicly available for anyone to use. Please feel free to share on social media.
